How to determine
TC size?

| Tri Clamp | Ferrule OD |  |
| :---: | :--- | :--- |
| $1 "$ | $=$ | $1.984 "$ |
| $1-1 / 2 "$ | $=$ | $1.984 "$ |
| $2 "$ | $=$ | $2.516 "$ |
| $2-1 / 2 "$ | $=$ | $3.047 "$ |
| $3 "$ | $=$ | $3.579 "$ |
| $4 "$ | $=$ | $4.682 "$ |

## How to determine

 national pipe size??| OD Fraction Inch <br> (for quick reference only) | Pipe Thread Size |
| :---: | :---: |
| $5 / 16$ | $1 / 16$ |
| $13 / 32$ | $1 / 8$ |
| $35 / 64$ | $1 / 4$ |
| $43 / 64$ | $3 / 8$ |
| $27 / 32$ | $1 / 2$ |
| $1-3 / 64$ | $3 / 4$ |
| $1-5 / 16$ | 1 |
| $1-21 / 32$ | $1-1 / 4$ |
| $1-29 / 32$ | $1-1 / 2$ |
| $2-3 / 8$ | 2 |
| $2-7 / 8$ | $2-1 / 2$ |
| $3-1 / 2$ | 3 |
| 4 | $3-1 / 2$ |
| $4-1 / 2$ | 4 |

Pipe sizes do not refer to any physical dimensions. The outside diameter of each pipe or fitting must by measured and compared to the table for size identification. For example, a 3/4" NPT pipe thread has an outside diameter of 1.050 inches.
